DETAILED ACTION

Claim Rejections - 35 USC § 103

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 1 and 4-6 are rejected under 35 U.S.C. 103(a) as being unpatentable over Ikeda et al (5,071,727).

Ikeda et al discloses a method for evaluating whiteness of light from a light source comprising the steps of (a) calculating chroma (C) (column 10, lines 20-21), calculating whiteness from the chroma using an equation (1) $w = aC + b$... (it is noted that the equation in column 10, line 7 of Ikeda et al is in the same form of the equation (1) of the present invention). Ikeda et al does not explicitly teach that the chroma is calculated by a method defined by the CIE 1997 Interim Color Appearance Model, however, it would have been obvious to use replace the calculating method of Ikeda et al by this method because they are function in the same manner.

Regarding claims 4-6, it would have been an obvious matter of design choice to choose the coefficients a and b.

Allowable Subject Matter

3. Claim 7 is allowed.

4. Claims 2-3 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Response to Arguments

5. Applicant's arguments filed 3/24/03 have been fully considered but they are not persuasive.

As mentioned above the Ikeda et al reference read on the claimed invention, especially equation in column 10, line 7. As understood, equation can be derives as follow:

$$W=1-1/40\{C^2+[4(10-V)]^2\}^{1/2}$$

$$W= -1/40\{C^2+[4(10-V)]^2\}^{1/2} + 1$$

When: $+[4(10-V)]^2$ is a very small number, we have

$$W= -1/40\{C^2\}^{1/2} + 1$$

Thus, $W=-1/40C + 1$

Let $a= -1/40$ and $b= 1$, $W= aC + b$, therefore the equation is the same as equation claimed in present claim 1.

Thus, in view of the foregoing, it is believed that the Ikeda et al read on the claimed invention.

6. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

Art Unit: 2877

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
